

Home Made Earth Quake Alarm by Electronics & Hardware Students

Summary :

UPG +2 HIGH SCHOOL (DALKI) is situated in very interior area of Goelkera block of West Singhbhum District. Dalki is very small village but vocational trainer **Kumari Puja Sahu** is inspiring trainer and has awareness regarding Vocational education. 40 student are enrolled in vocational education in the school. After joining she had faced few problems because all student were knowing only the local language but she managed to do a fine job related to vocational education awareness and enrolling students in the trade. But the school does not have any labs and without lab Kumari Puja Sahu herself arranged all equipment and demonstrated how to make **Earth quake Alarm** with the 40 students enrolled in Electronics and hardware trade in class 9th. Out of 40 students enrolled, **28 girl** candidates are enrolled in Electronic and Hardware and rest are boys.

Result:

Student learn how to make homemade Earth Quake Alarm, Safety and precaution during earth quake, How to use Earth Quake Alarm (student feedback is very satisfactory and they are excited to learn about handmade Earth Quake Alarm).

School feedback :

Mr. Subhash Chandra Languri is principal of UPG +2 High School ,DALKI (West singhbhum) principal very supportive and innovative and he is saying regarding NSQF Project .
