Supplementary module for advance technology in IT-ITeS supported by Microsoft

Purpose: Supplementary module for advance technology in IT-ITeS to improve employability and future prospects of IT Students in Level 3 and 4 in **Vocational Education**.

How it works: Vocational Trainers were given a 3-day training on AI & Machine Learning who will in turn train students in classrooms.

Outcomes:

1) Career counselling session for students of class 11th & 12th to understand there inhibition/concerns with regard to career in technology.

2) Encourage students to pursue career as per their area of interest.

3) This intervention would be supported by **Microsoft** and the students would get a chance to meet the Microsoft employees which would motivate and encourage them to take meaningful careers post their education.

4) Students would receive certificate of completion from Microsoft Technologies.
